

Final Project Update

Jacob Morrison

Grand Valley State University

4 December 2024

Requirements

- 10-15ish minutes
- Expand on midterm presentation
 - what has changed
 - celebrate final deliverable
- Introduce each team member
- Describe your project at a high level. We should all know what each other is doing at this point, but it helps to "set the stage" for your presentation
- Did you hit your project time goals?
- What has changed since the midterm?
- Demonstration of your final implementation + discuss how it can be installed/deployed (e.g., if one of your classmates is interested).
- For this assignment, please put together a set of presentation slides and upload them as a PDF for this assignment along with your video.
- Please also upload the PDF of your presentation into your GitHub docs folder.

Introduction

- Group Name: Packing the Bits
- Ground Members: Jacob Morrison
- A little bit about myself
 - Bioinformatics Research Scientist at Van Andel Institute
 - Work in a lab that studies the origins of ovarian cancer
 - Develop and maintain software for analyzing DNA sequencing data
- Project: Create a small tool to improve the speed of one of the tools I maintain for work

Thank You
